

I must encourage you to not allow the CBA's request to allow an exemption for established business relationships to Indiana's Telephone Privacy Law. The CBA is attempting to impose the federal "established business relationship" exemption on Indiana consumers. I do not want anyone that I have a current business relationship with like my utilities, bank or credit card company to be able to call me whenever and as often as they want. This gross invasion of my privacy is the reason I signed up with the "No Call" list to begin with - to protect myself from just these call. Please deny this petition.
